International Journal of Food Microbiology, 9 (1989) 363–364
Elsevier

Author index

Ahvenainen, R., see Mattila, T. (9) 205
Alanko, T., see Korkeala, H. (9) 237
Ardhana, M.M. and Fleet, G.H.
The microbial ecology of tape ketan fermentation (9) 157

Bartholomew, B.A., see Todd, L.S. (9) 145
Blais, B.W. and Yamazaki, H.
Extraction of *Salmonella* antigens in non-sedimentable forms for enzyme immunoassay (9) 63
Brocklehurst, T.F., see Sims, G.R. (9) 173

Collins-Thompson, D.L., see Slade, P.J. (9) 197

Daftarian, H., see Raccach, M. (9) 25
Doyle, M.P., see Lammerding, A.M. (9) 249

Farkas, J.
Microbiological safety of irradiated foods (9) 1
Fistrovici, E.C., see Slade, P.J. (9) 197
Fleet, G.H., see Ardhana, M.M. (9) 157
Fricker, C.R. and Tompsett, S.
Aeromonas spp. in foods: A significant cause of food poisoning? (9) 17

Geldreich, E.E.
Drinking water microbiology—new directions toward water quality enhancement (9) 295
Genigeorgis, C.A.
Present state of knowledge on staphylococcal intoxication (9) 327
Glenister, D.A., see Sims, G.R. (9) 173

Hardy, J.C., see Todd, L.S. (9) 145
Hughes, A.H. and McDermott, J.C.
The effect of phosphate, sodium chloride, sodium nitrite, storage temperature and pH on the growth of enteropathogenic *Escherichia coli* in a laboratory medium (9) 215
Huss, H.H., see Jørgensen, B.R. (9) 51

Jooste, P.J., see Wessels, D. (9) 79
Jørgensen, B.R. and Huss, H.H.
Growth and activity of *Shewanella putrefaciens* isolated from spoiling fish (9) 51

Kıvanç, M.
A survey on the microbiological quality of various cheeses in Turkey (9) 73
Knøchel, S.
Effect of temperature on hemolysin production in *Aeromonas* spp. isolated from warm and cold environments (9) 225
Korkeala, H. and Mäkelä, P.
Characterization of lactic acid bacteria isolated from vacuum-packed cooked ring sausages (9) 33
Korkeala, H., Alanko, T., Mäkelä, P. and Lindroth, S.
Shelf-life of vacuum-packed cooked ring sausages at different chill temperatures (9) 237

Lammerding, A.M. and Doyle, M.P.
Evaluation of enrichment procedures for recovering *Listeria monocytogenes* from dairy products (9) 249
Lindroth, S., see Korkeala, H. (9) 237
Lund, B.M., see Sims, G.R. (9) 173

Mäkelä, P., see Korkeala, H. (9) 237
Mäkelä, P., see Korkeala, H. (9) 33
Mattila, T. and Ahvenainen, R.
Preincubation time and the use of oxygen indicators in determining the microbiological quality of aseptically packed pea and tomato soup (9) 205
McDermott, J.C., see Hughes, A.H. (9) 215
McGrath, R., see Raccach, M. (9) 25
Mehta, R., Narayan, K.G. and Notermans, S.
DOT-enzyme linked immunosorbent assay for detection of *Clostridium perfringens* type A enterotoxin (9) 45
Mossel, D.A.A.
Adequate protection of the public against

0168-1605/89/$03.50 © 1989 Elsevier Science Publishers B.V. (Biomedical Division)

food-transmitted diseases of microbial aetiology. Achievements and challenges, half a century after the introduction of the Prescott-Meyer-Wilson strategy of active intervention (9) 271
Mostert, J.F., see Wessels, D. (9) 79

Narayan, K.G., see Mehta, R. (9) 45
Notermans, S., see Mehta, R. (9) 45

Raccach, M., McGrath, R. and Daftarian, H.
Antibiosis of some lactic acid bacteria including *Lactobacillus acidophilus* toward *Listeria monocytogenes* (9) 25

Sims, G.R., Glenister, D.A., Brocklehurst, T.F. and Lund, B.M.
Survival and growth of food poisoning bacteria following inoculation into cottage cheese varieties (9) 173
Singh, G., see Toora, S. (9) 167
Singh, G., see Toora, S. (9) 167
Slade, P.J., Fistrovici, E.C. and Collins-Thompson, D.L.
Persistence at source of *Listeria* spp. in raw milk (9) 197
Stringer, M.F., see Todd, L.S. (9) 145

Tiwari, R.P., see Toora, S. (9) 167
Todd, E.C.D.
Costs of acute bacterial foodborne disease in Canada and the United States (9) 313
Todd, L.S., Hardy, J.C., Stringer, M.F. and Bartholomew, B.A.
Toxin production by strains of *Aeromonas hydrophila* grown in laboratory media and prawn purée (9) 145
Tompsett, S., see Fricker, C.R. (9) 17
Toora, S., Singh, G., Tiwari, R.P. and Singh, G.
Drug resistance and lecithinase activity of *Yersinia enterocolitica* isolated from buffalo milk (9) 167

Wessels, D., Jooste, P.J. and Mostert, J.F.
Psychrotrophic, proteolytic and lipolytic properties of Enterobacteriaceae isolated from milk and dairy products (9) 79

Yamazaki, H., see Blais, B.W. (9) 63

International Journal of Food Microbiology, 9 (1989) 365–366
